Aaditee Agrawal

+91-6386862949 | Mohali, Punjab | aadiagrawal69@gmail.com | LinkedIn | GitHub | LeetCode

Professional Summary

Software Engineer with hands-on experience building Python-based data processing, validation, and cloud applications using PySpark, SQL, REST APIs, and Microsoft Azure. Experienced in developing ETL pipelines, automated data validation frameworks, and distributed data processing solutions using Microsoft Fabric and Delta Lake. Strong foundation in object-oriented programming, data structures, algorithms, and software engineering.

Education

Chandigarh University — Mohali, Punjab
B.E. in Computer Science Engineering — CGPA: 7.85 — *Aug. 2022 – Jul. 2026*

Technical Skills

Programming: Python, C++, SQL, Object-Oriented Programming, Data Structures, Algorithms
Data Engineering: PySpark, Microsoft Fabric, Azure Data Factory, ETL/ELT, Distributed Data Processing, Data Pipeline Design
Cloud & Databases: Microsoft Azure, ADLS Gen2, Azure Blob Storage, Azure Cosmos DB, SQL Server, MySQL
Software Engineering: REST APIs, Git, GitHub, Docker, CI/CD Fundamentals
AI & LLM: LLMs, RAG, LangChain, Prompt Engineering, Vector Databases
Machine Learning: scikit-learn, Random Forest, Decision Trees, Feature Engineering, Model Evaluation, RMSE, MAE
Core Concepts: Data Quality, Data Validation, Data Modeling, Data Warehousing, Data Lakehouse Architecture

Experience

Optimus Information Inc. — Mohali, Punjab
Software Engineer Intern – Data Engineering — *Mar. 2026 – Aug. 2026*

- Engineered data quality and ETL validation frameworks using Python, PySpark, Microsoft Fabric, and REST APIs to automate pipeline testing across multiple data sources.
- Designed reusable validation checks with Delta Lake logging and quarantine architecture to improve failure detection, traceability, and data pipeline reliability.
- Built source-to-Gold validation workflows and Power BI dashboards to monitor pipeline quality and provide data observability to stakeholders.

Projects

Data Pipeline using Microsoft Fabric and PySpark — Jun. 2026 – Jul. 2026

- Architected an end-to-end batch data pipeline using Microsoft Fabric, PySpark, and Azure Data Lake Storage for scalable data processing.
- Implemented Delta Lake storage and partitioning strategies to optimize data organization, query performance, and pipeline scalability.

Predicting Flight Delays with Machine Learning — Apr. 2026 – Jun. 2026

- Developed a flight-delay prediction model using Python and scikit-learn with Random Forest and Decision Tree algorithms, achieving 91% accuracy.
- Performed data preprocessing, feature engineering, model training, and evaluation using RMSE and MAE.

Incremental CDC Data Ingestion Pipeline — Feb. 2026 – Apr. 2026

- Built an incremental data ingestion pipeline using Azure Data Factory and SQL Server Change Data Capture (CDC) to efficiently process modified records.
- Implemented Slowly Changing Dimension Type 2 logic using PySpark and added schema and data validation checks to maintain consistency across ingestion runs.
- Containerized pipeline components using Docker and integrated Azure Cosmos DB for semi-structured data storage.

Certifications

Microsoft Certified: Fabric Data Engineer Associate (DP-700)
Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)
Microsoft Azure Fundamentals (AZ-900)
Databases and SQL for Data Science with Python – Coursera
Cloud Computing Course – Elite Silver Certification, NPTEL

Achievements

Competitive Coding: Solved 300+ DSA problems on LeetCode with focus on algorithms and data structures.
Performer of the Month: Recognized for exceptional performance while delivering a client project during internship at Optimus Information.
Talent Park: Certificate of Achievement – Top 5% in Talent Park by Unstop.
